

Let's Elevate the R/Evolution

Elevate the R/Evolution

Humans evolved in harmony with cannabis for millennia, our bodies and the plant chemically intertwined in a synchronicity so perfect that modern science is only beginning to understand it.

For the better part of a century, we've had our ears shut to the music of this plant, but its song still rings in our heads. A few brave souls have kept its strains alive, and now we are all part of a powerful reunion with this partner in health, inspiration and wisdom.

**CBD
THE
TRUTH**

**CBD is a natural antidote
to the woes of modern life.**

It raises our state of mind,
uplifts our consciousness, and
makes us feel good. It's our
daily dose of freedom - from
pain, from stress - and from the
restricted perceptions of the last
eight decades.

We can't tell you it will
...
[take the edge off your anxiety]
...
so you'll just have to try it and see

“Best CBD on the market by far! I’ve tried all the reputable companies and Upstate Elevator stands out in the crowd. The testing, quality, and service are superior. The results are almost instantaneous with every product I have ever tried and to me that confirms the authenticity of the ingredients stated on their products”

-Susan Lee

Choose Your Upstate

**Clean, natural and pure cannabinoids
are the foundation of all Upstate
products.**

A non-psychoactive cannabinoid derived from some strains of hemp, CBD is just one of many factors – including other cannabinoids, terpenes, and even tiny amounts of THC – that work synergistically and interact beautifully with human physiology. It's no accident – we evolved this way, together.

Sustainably sourced hemp is meticulously processed through

one of our three extraction methods to preserve the full spectrum of constituents in the most beneficial combinations, specific to the products they're intended for. We make stripped clean, pure cannabinoids, elevated to their purest forms, and we have them third-party tested so you know what you're getting is a cut above.

The Elevation of Cultivation

Where do we grow our hemp?

We partner with Pete's Greens to grow the hemp we use to make our products on 70 acres of pristine farmland in Craftsbury, Vermont. Our hemp crop is USDA Certified Organic, non-GMO, pesticide free and sustainably grown using our own proprietary seed stock. Clean soil, water and fresh Vermont air makes for clean hemp, and that's the key to crafting clean cannabinoids that you can feel good about using every day.

The Elevation of Sourcing

Where did we find our specially selected strains?

We made most of them from scratch. Our family has been developing top-of-the-industry cultivars through rigorous selective breeding since before we could tell you about it. At Upstate Elevator Supply Co. we've focused our research on the development of high CBD:THC type III CBD-rich cultivars with robust terpene profiles that are optimized for the short Vermont growing season.

The Elevators of Upstate

Our agricultural and entrepreneurial roots trace back to the 1800s in the Central Valley of Costa Rica, where our ancestors established some of the first coffee plantations in the Americas. This proud tradition of agricultural stewardship has carried on for generations through our family's enterprises, and the legacy of enterprising agriculture is strong today in Upstate Elevator Supply Co., our Burlington, Vermont-based CBD company.

From those first coffee plantings in the 19th century through the founding of Upstate Elevator Supply Co. in 2017, our passion has been revitalizing the connection between humans and plants. We're true pioneers in the field, crafting products that are mindfully shepherded from cultivar to capsule, seed to salve, to make you the finest fleet of CBD available anywhere.

We're here to guide you to your Upstate.

What do you do every day to feel alive?
A morning cup of coffee just the way
you like it, yoga with the morning sun
peeking in the window, walking the
dog by the river in the evening when
your breath forms clouds before your
face. CBD products are your daily
dose of freedom, elevating health and
celebrating wellbeing. Our continuous
drive for product development is rooted
in finding the right way to make CBD
part of your every day.

**A finely-tuned co-evolution
is being restored.**

**It's a reclamation, a revival,
a r/evolution.**
